

# Final Project (C12)

---

**SubmittedTo :- Suthakhar**

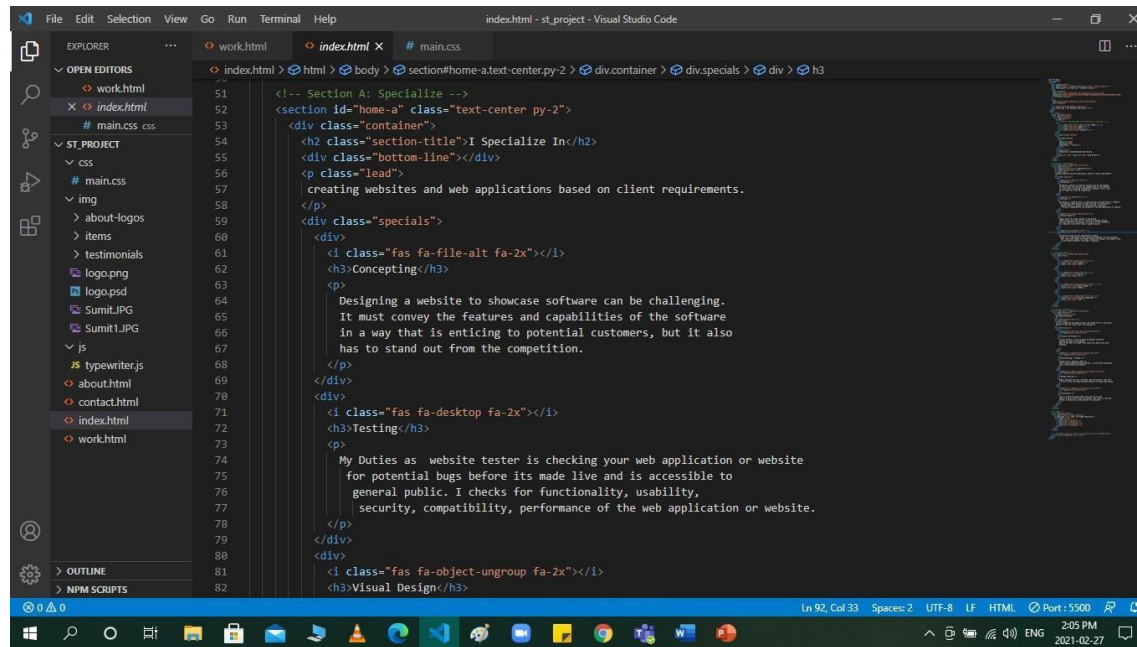

**Submitted by :- Gurpreet Singh**

**1) Write detail of index Page, include detail of each div or section that is used, add screenshot there 1 from coding and 1 from output.**

---

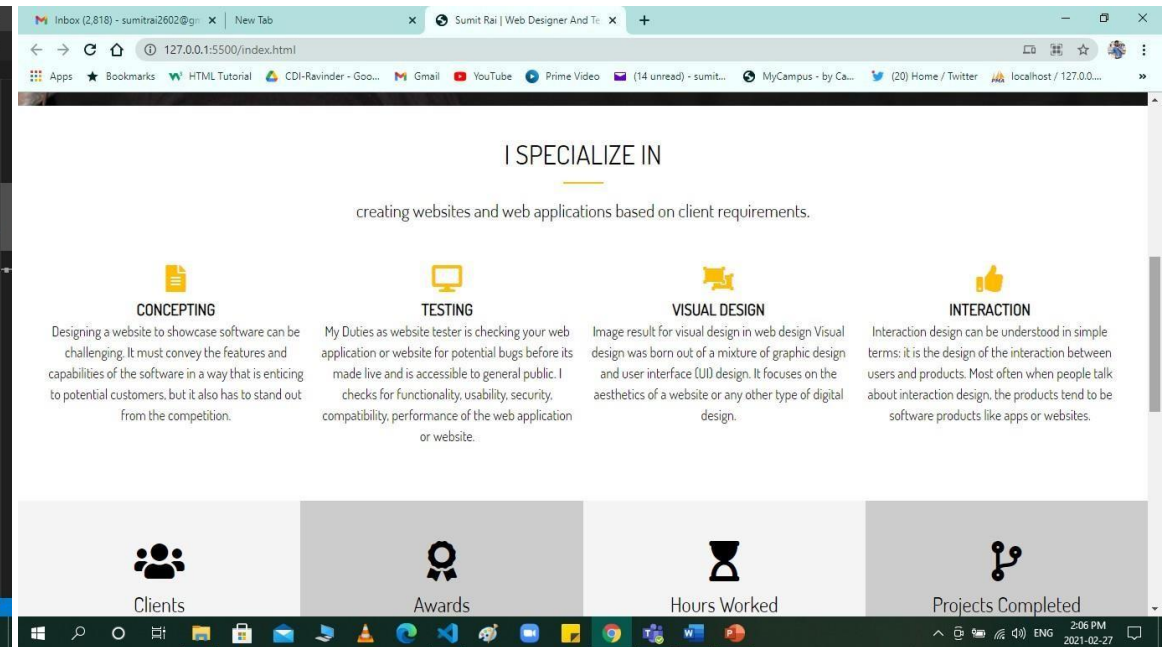

Index page:- In the index page there are three sections used to separate the different parts of the page. Each section contains nearly seven div to divide the page information. On the top there is header section which contains the navigation bar with logo of my name on the one side. There is image tag is used to add picture in the header tag which is then adjust using the CSS. With the help of media queries the text is molded into stylish way that attract the people.

# Section A(Div.)

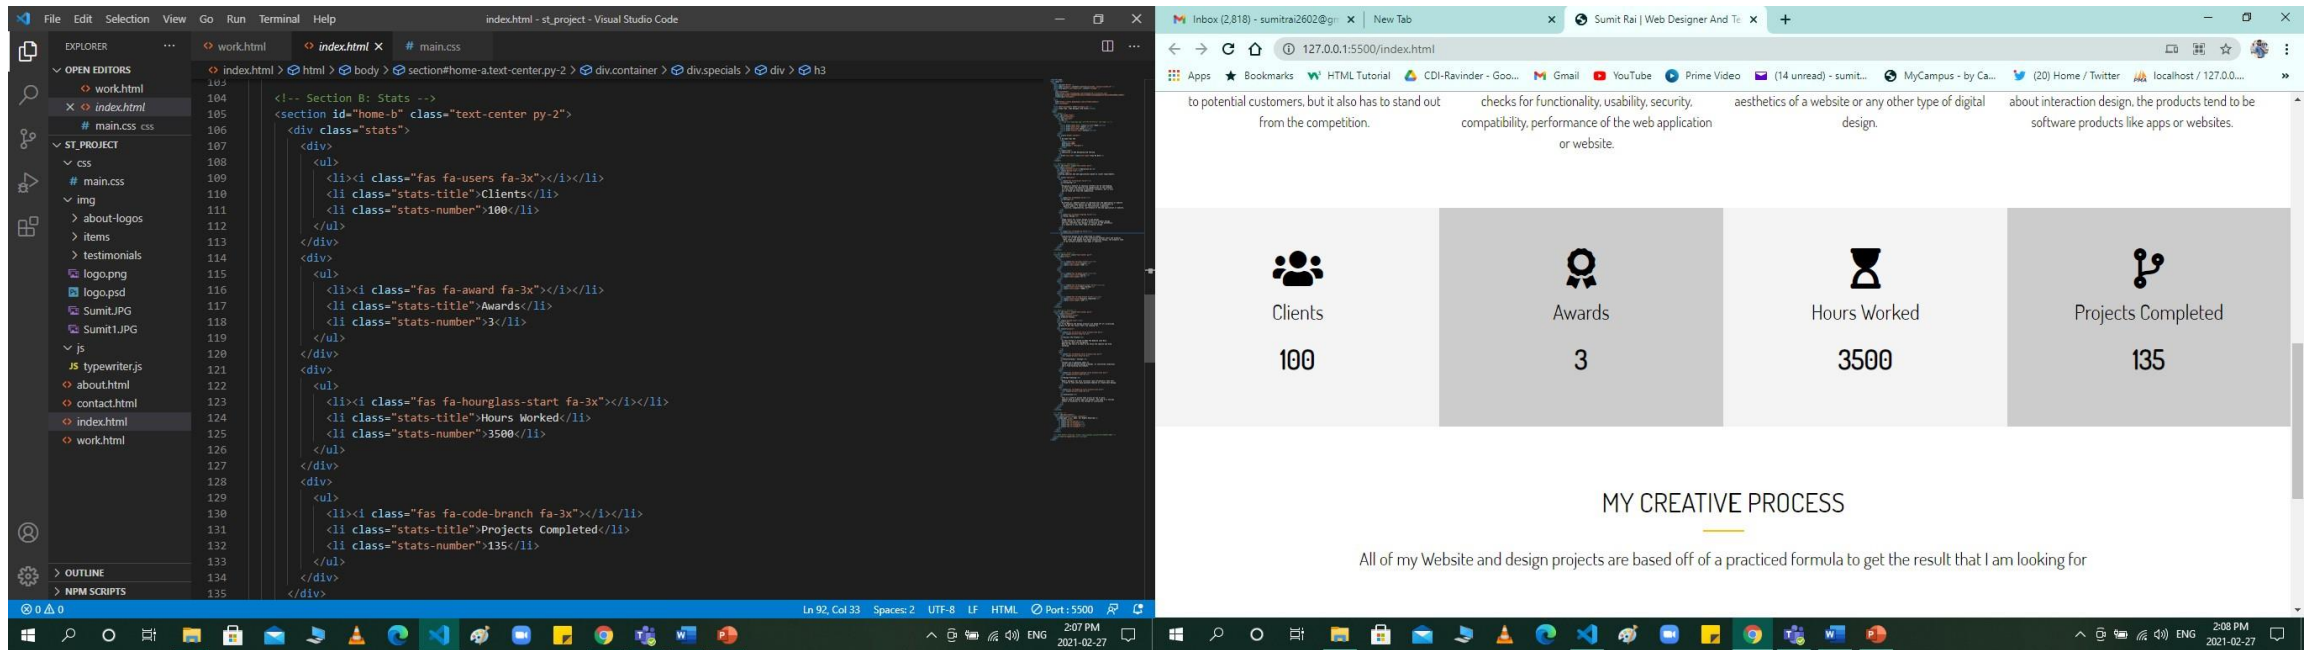

```
<!-- Section A: Specialize -->
<section id="home-a" class="text-center py-2">
  <div class="container">
    <h2 class="section-title">I Specialize In</h2>
    <div class="bottom-line"></div>
    <p class="lead">
      creating websites and web applications based on client requirements.
    </p>
    <div class="specials">
      <div>
        <i class="fas fa-file-alt fa-2x"></i>
        <h3>Concepting</h3>
        <p>
          Designing a website to showcase software can be challenging.
          It must convey the features and capabilities of the software
          in a way that is enticing to potential customers, but it also
          has to stand out from the competition.
        </p>
      </div>
      <div>
        <i class="fas fa-desktop fa-2x"></i>
        <h3>Testing</h3>
        <p>
          My Duties as website tester is checking your web application or website
          for potential bugs before its made live and is accessible to
          general public. I checks for functionality, usability,
          security, compatibility, performance of the web application or website.
        </p>
      </div>
      <div>
        <i class="fas fa-object-ungroup fa-2x"></i>
        <h3>Visual Design</h3>

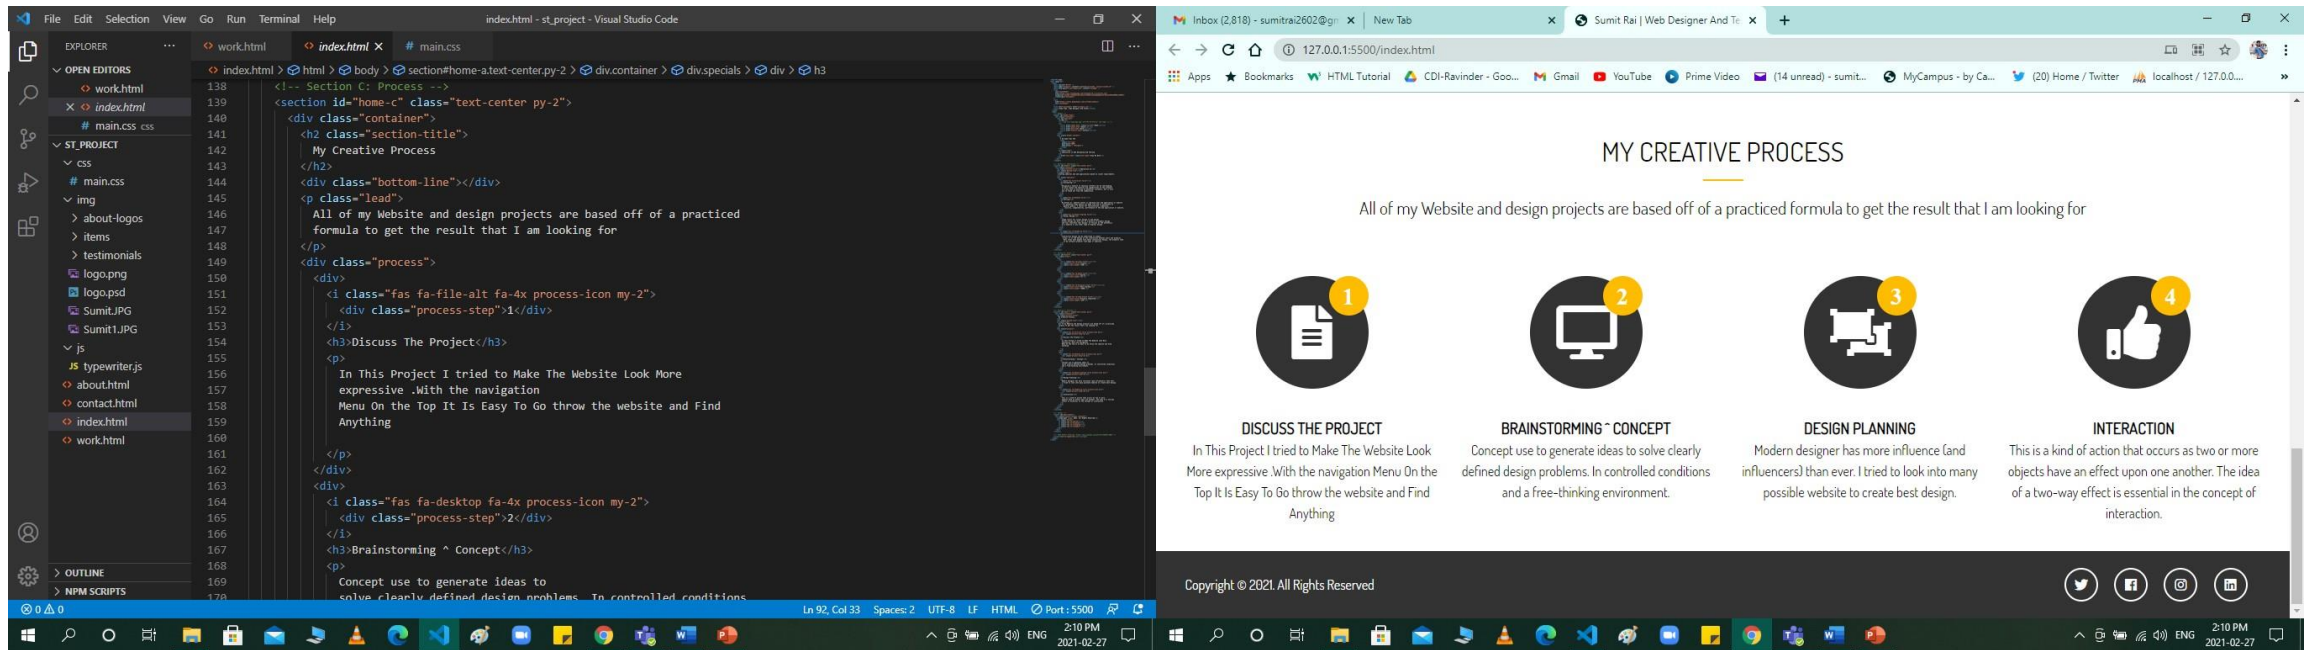

```

# Section B(Div.)

# Section C(Div.)

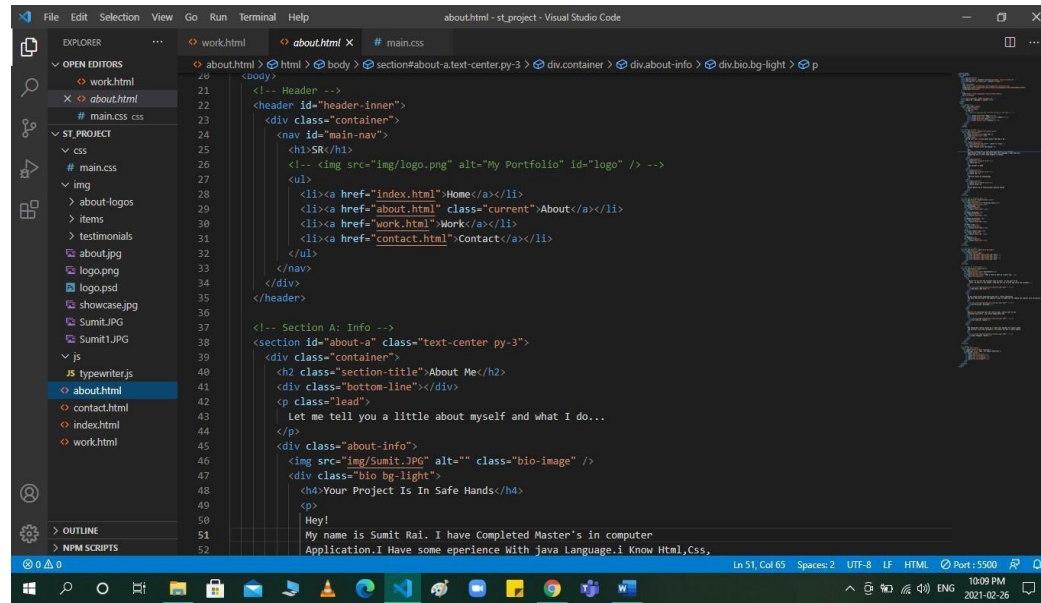

2) Write detail of about Page included detail of each div or section that is used, add screenshot there 1 from coding and 1 from output.

---

**About page:-** The about page contains the 4 sections. The section A contains the seven div tags for Personal information and the awards part for the awards that I received. After that the section B is used for the technical skills with the seven div tags with the containers class. Thereafter, the section C for the logos from the technical skills for best understanding. The section D Last section is used for the feedback from the customers or clients to show on the page.

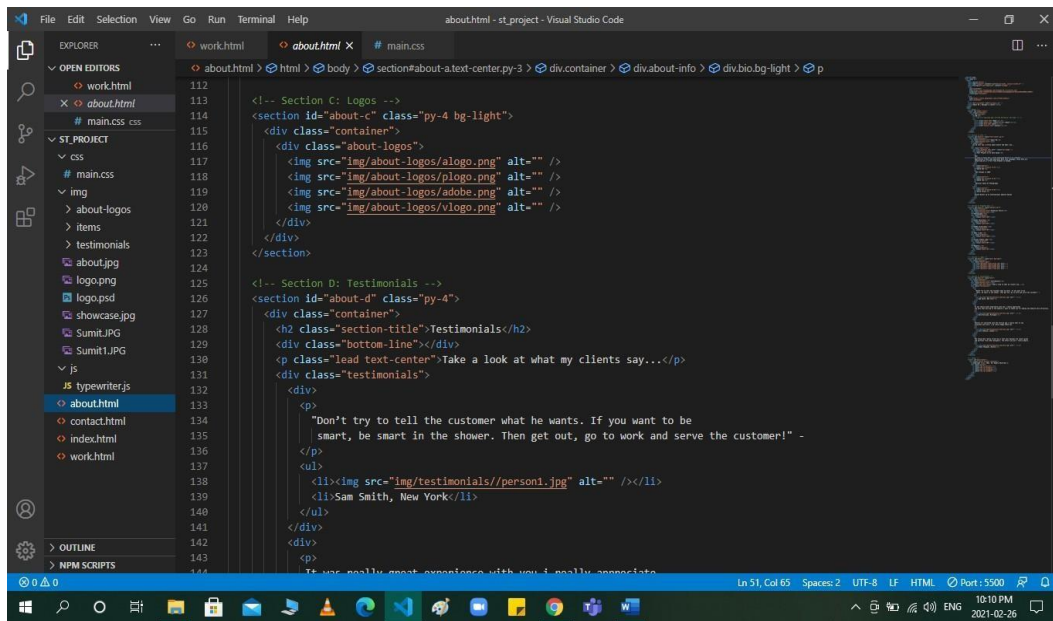

# Section A(Div. )

---

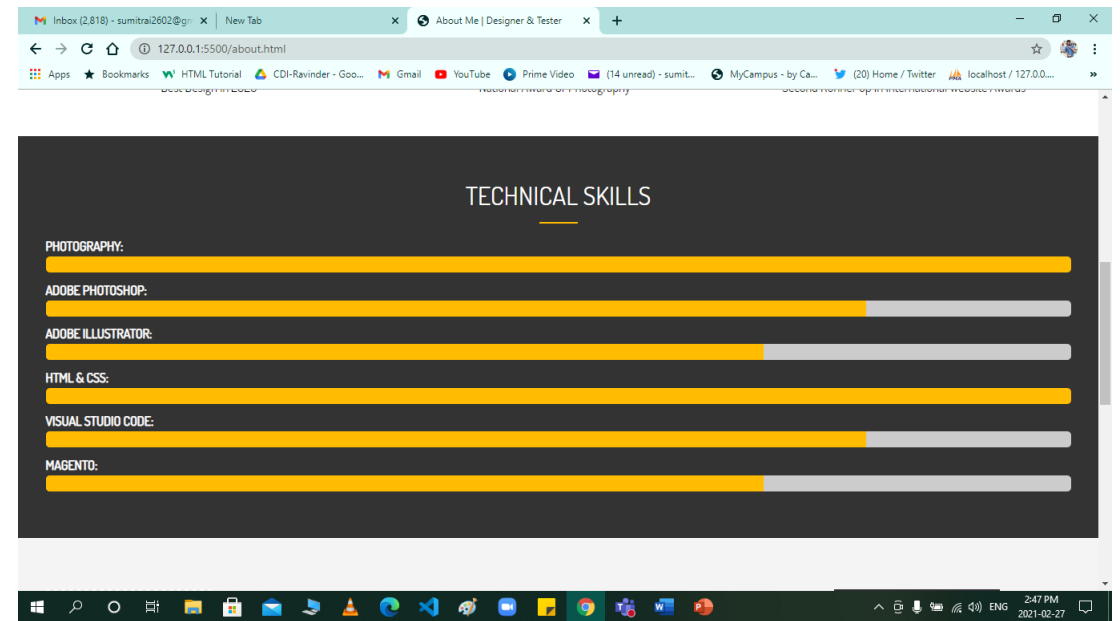

```
20 <body>
21 <!-- Header -->
22 <header id="header-inner">
23   <div class="container">
24     <nav id="main-nav">
25       <h1>SR</h1>
26       <!--  -->
27       <ul>
28         <li><a href="index.html">Home</a></li>
29         <li><a href="about.html" class="current">About</a></li>
30         <li><a href="work.html">Work</a></li>
31         <li><a href="contact.html">Contact</a></li>
32       </ul>
33     </nav>
34   </div>
35 </header>
36
37 <!-- Section A: Info -->
38 <section id="about-a" class="text-center py-3">
39   <div class="container">
40     <h2 class="section-title">About Me</h2>
41     <div class="bottom-line"></div>
42     <p class="lead">
43       let me tell you a little about myself and what I do...
44     </p>
45     <div class="about-info">
46       
47       <div class="bio bg-light">
48         <h4>Your Project Is In Safe Hands</h4>
49         <p>
50           Hey!
51           My name is Sumit Rai. I have Completed Master's in computer
52           Application.I Have some experience With java Language.I Know Html,Css,
```

# Section B(Div.)

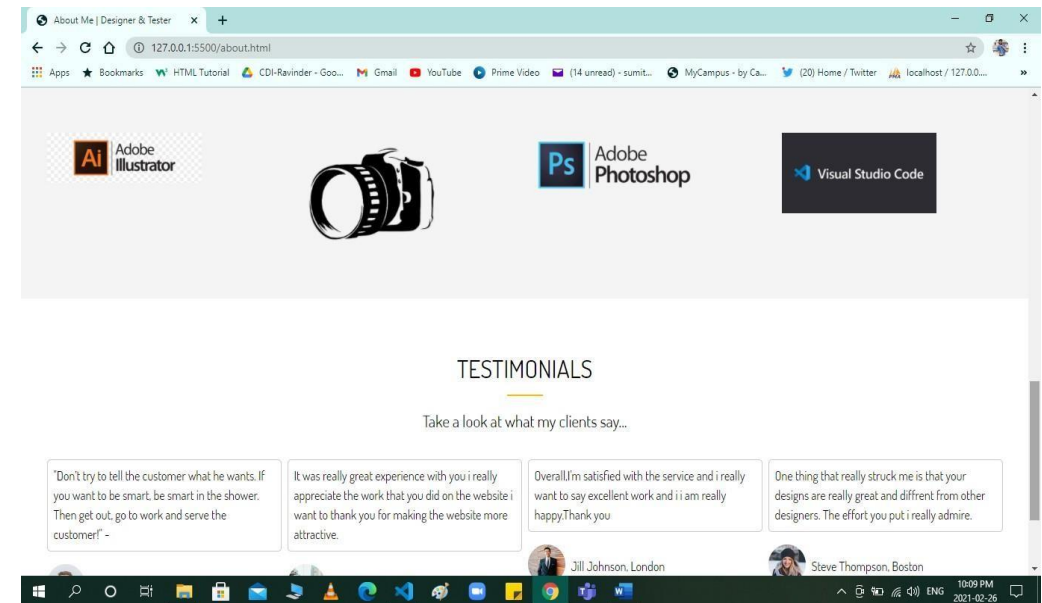

The screenshot shows the Visual Studio Code editor with a project named 'about.html - st\_project'. The Explorer sidebar on the left shows the file structure, including 'work.html', 'main.css', and various image files. The main editor displays the HTML code for 'about.html', specifically the 'Logos' section. The code includes a section with an ID of 'about-c' and a class of 'py-4 bg-light', containing a container with a class of 'container'. Inside this container is a div with a class of 'about-logos' which contains four image tags with different alt attributes. The code is as follows:

```
112 <!-- Section C: Logos -->
113 <section id="about-c" class="py-4 bg-light">
114   <div class="container">
115     <div class="about-logos">
116       
117       
118       
119       
120     </div>
121   </div>
122 </section>
123
124 <!-- Section D: Testimonials -->
125 <section id="about-d" class="py-4">
126   <div class="container">
127     <h2 class="section-title">Testimonials</h2>
128     <div class="bottom-line"></div>
129     <p class="lead text-center">Take a look at what my clients say...</p>
130     <div class="testimonials">
131       <div>
132         <p>
133           "Don't try to tell the customer what he wants. If you want to be
134           smart, be smart in the shower. Then get out, go to work and serve the customer!" -
135         </p>
136         <ul>
137           <li></li>
138           <li>Sam Smith, New York</li>
139         </ul>
140       </div>
141     </div>
142   </div>
143 </section>
144
```

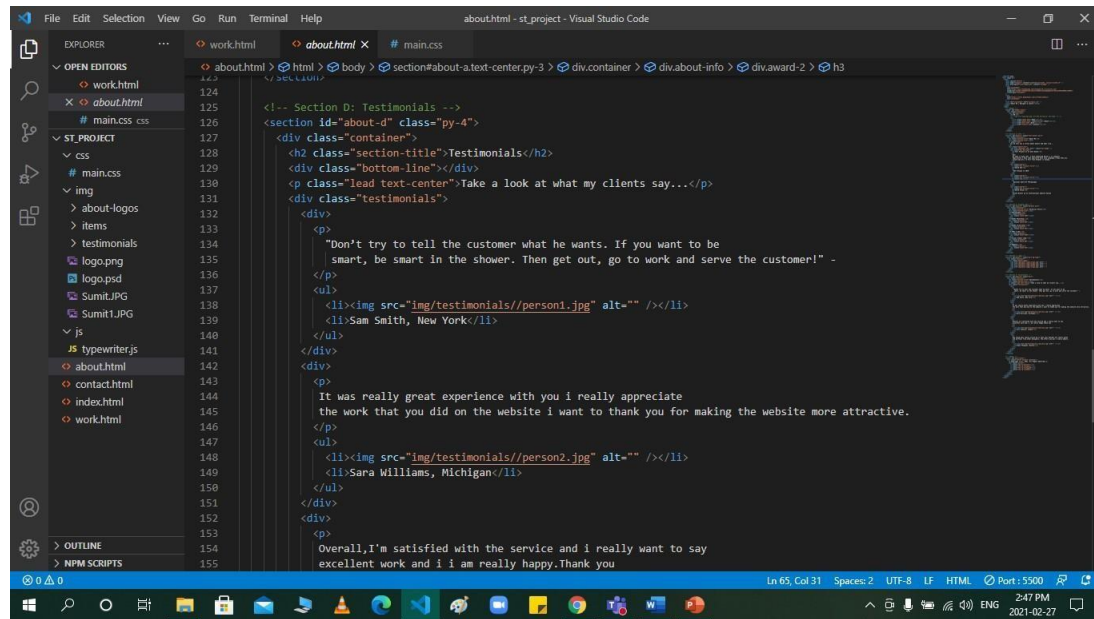

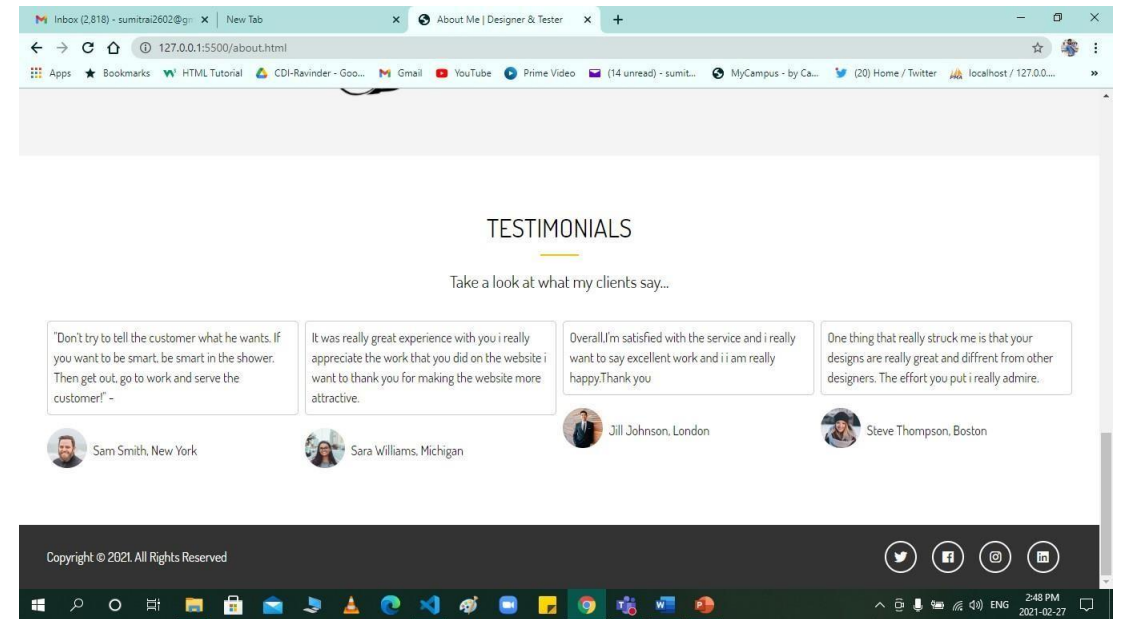

# Section C(Div.)

# Section D(Div.)

```
124
125
126 <!-- Section D: Testimonials -->
127 <section id="about-d" class="py-4">
128   <div class="container">
129     <h2 class="section-title">Testimonials</h2>
130     <div class="bottom-line"></div>
131     <p class="lead text-center">Take a look at what my clients say...</p>
132     <div class="testimonials">
133       <div>
134         <p>
135           "Don't try to tell the customer what he wants. If you want to be
136           smart, be smart in the shower. Then get out, go to work and serve the customer!" -
137         </p>
138         <ul>
139           <li></li>
140           <li>Sam Smith, New York</li>
141         </ul>
142       </div>
143       <div>
144         <p>
145           It was really great experience with you i really appreciate
146           the work that you did on the website i want to thank you for making the website more attractive.
147         </p>
148         <ul>
149           <li></li>
150           <li>Sara Williams, Michigan</li>
151         </ul>
152       </div>
153       <div>
154         <p>
155           Overall, I'm satisfied with the service and i really want to say
156           excellent work and i i am really happy.Thank you
```

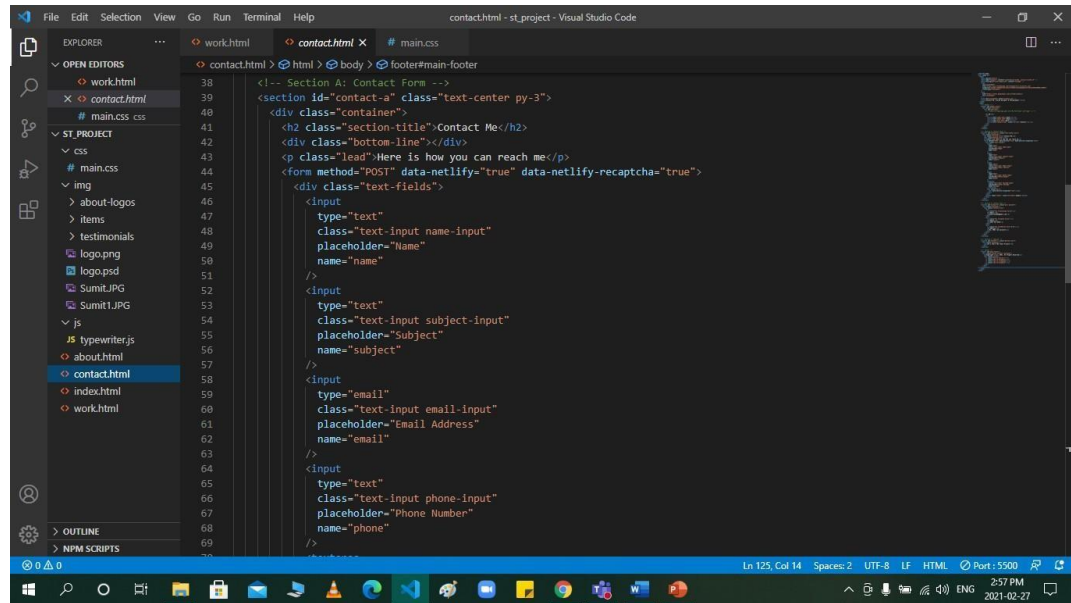

3) Writedetailofcontact**Pageincludedetailofeachdivorsectionthatisused**,addscreenshothere1 from coding and 1 from output.

---

**Contact Page:-** The contact page is have three sections with three div tags in the first two sections and with only one section in the last part. The first section allows the page to get the information from the customer to get the information to contact the customers. In the next section there is the information regarding to contact me thru email , phone number and my address.

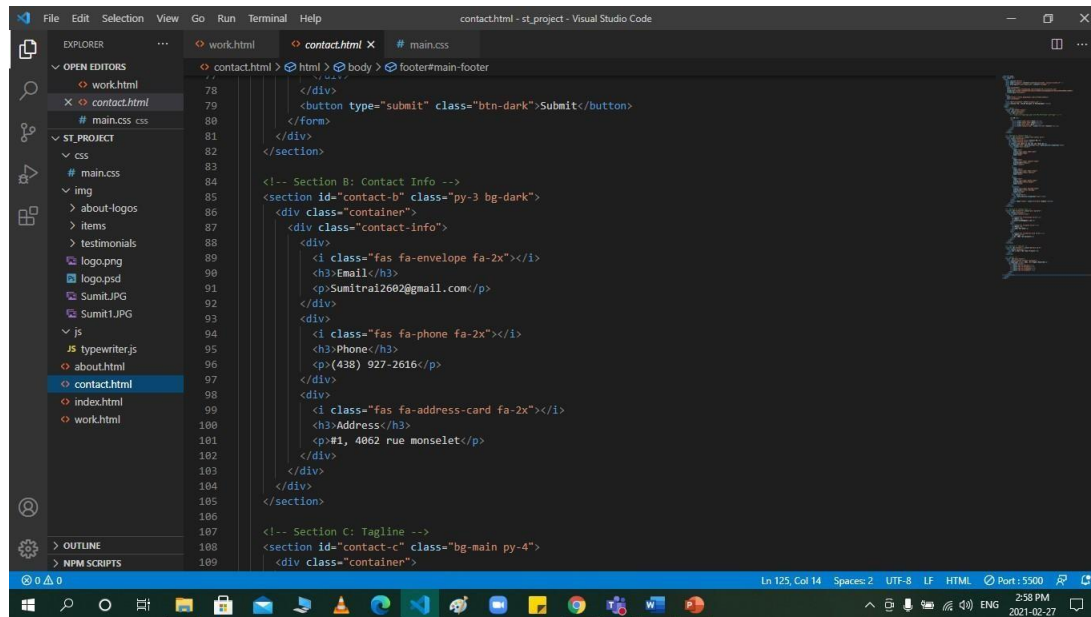

# Section A(Div.)

---

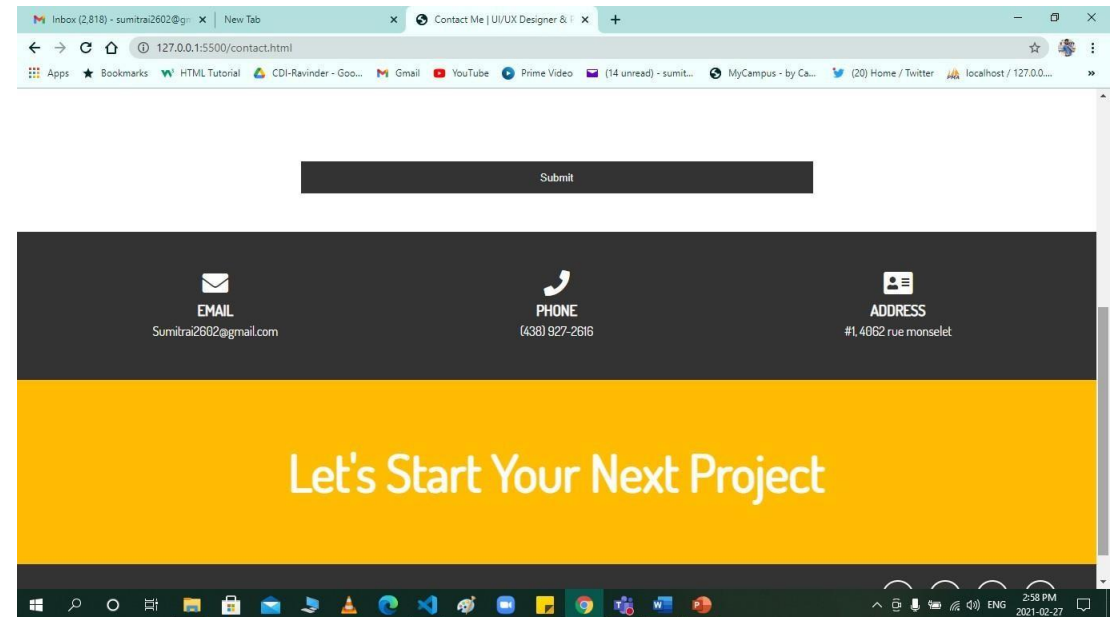

```
38 <!-- Section A: Contact Form -->
39 <section id="contact-a" class="text-center py-3">
40   <div class="container">
41     <h2 class="section-title">Contact Me</h2>
42     <div class="bottom-line"></div>
43     <p class="lead">Here is how you can reach me</p>
44     <form method="POST" data-netlify="true" data-netlify-recaptcha="true">
45       <div class="text-fields">
46         <input
47           type="text"
